Experience

Prodigy Info Tech

Front-End Developer Intern

July, 2024

Remote

- Built and maintained responsive, interactive web pages using React.js, HTML5, CSS3, and JavaScript.
- Collaborated with the team to develop reusable and modular components, ensuring scalability and efficient development workflows.
- Implemented responsive designs to enhance user experience across various devices and screen sizes.

Social Media Marketing Assistant

PLYXIO Marketing Agency

Jan -Sep 2024

Remote

- Spearheaded content creation and managed scheduling across 4+ major social media platforms, boosting audience reach.
- Tracked and analyzed campaign performance using Meta Business Suite, contributing actionable insights that improved engagement.
- Fostered a thriving online community by directly engaging with followers, increasing follower loyalty and retention.

COMSATS CSS Society

Marketing Head

2022-2024

COMSATS, Islamabad

- Executed comprehensive marketing strategies to spread awareness about the events held by society.
- Led a cross-functional team in planning and implementing successful marketing strategies

Academic Projects

Medical Inventory System | Java, Mongo DB

- Developed an all-in-one Medical Inventory Management System to facilitate seamless interaction among doctors, patients, and hospital management. The system centralizes the management of medical supplies, tracks inventory in real-time, and ensures efficient operations across various hospital departments.
- Implemented role-based access control to restrict functionality based on user roles, ensuring secure and efficient management.
- Automated alerts for low-stock items, expiration tracking for medical supplies, and streamlined order placements.

Advanced Billing System | Java, Java Swing

- Created a city-wide Electricity Billing System to automate bill calculations for users, track usage data, and maintain a record of the last two months' bills in a structured text file format.
- Designed an interactive Java Swing GUI for entering usage details, viewing bills, and generating invoices using Java file handling to store and retrieve user data, maintaining a record bills in text files for audit and user reference.
- Enhanced data security and integrity by validating user inputs and file operations to prevent errors in bill calculations.

Certifications

Management Team Lead Certificate: Recognized for exemplary leadership during the Career Expo COMSATS (2022/23).
